DECORATIVE PROFILES FOR TILES

Decorative profiles are made of high-quality acid-resistant stainless steel, characterized by high resistance to moisture, scratches and mechanical damages. They may be a delicate framing for separating surface laid with various tiles.

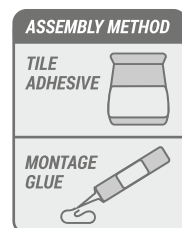

L-SHAPE AND U-SHAPE PROFILES FOR TILES

L-shape and U-shape profiles are used to finish the edges of a tiled area. If corners are not finished with miter joints, the edge of the tile will remain vulnerable to damage and generally leave you with unfinished look.

FLAT STRIPS FOR TILES

Stainless steel flat strips adopt simple installation method such as sticking, which makes the installation process relatively simple. They have smooth surface that makes cleaning and maintenance easy.

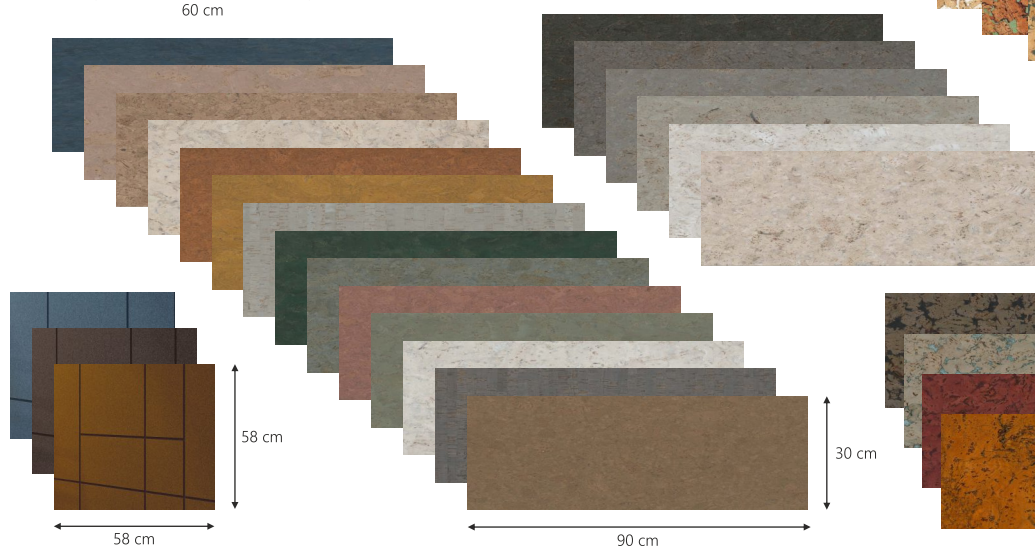

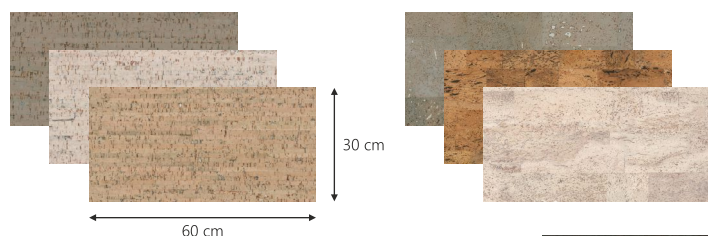

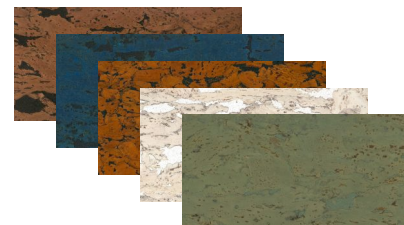

NATURAL CORK WALL TILES

EGEN®
HOME DESIGN

CORK WALL TILES

Cork wall tiles are a unique and practical solution. The material is highly resistant. Cork wall tiles fit almost every room decor.

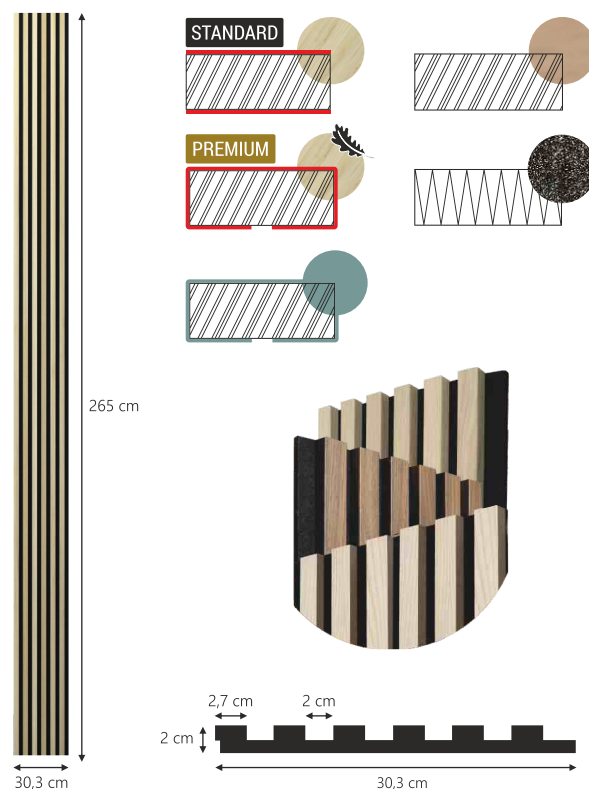

CORK BARK WALL TILES

Cork bark wall tiles are a unique wall covering made from virgin cork, which is an environmentally friendly product. They are not only beautiful but also very functional. Cork tiles reduce sounds, increase temperature and improve humidity inside the room.

STRAIGHT SLAT WALL PANELS

Elegant and incredibly versatile slat wall panels allow you to refresh quickly the appearance of your living room or bedroom, enlarge optically a corridor or create a separate zone within a large space. Thanks to their design your interior will get a contemporary character while maintaining a cosy ambience.

SQUARE SLAT WALL PANELS

They are easy to clean and can be installed quickly. Due to the unique nature of substrate, slats on felt backing have a higher sound absorption coefficient than slats based on HDF. The panels captivate not only with aesthetic but also with their durability and functionality.

MILLED AND WOODEN PANELS

EGEN®
HOME DESIGN

MILLED PANELS

Evoke the natural beauty of wood and create a unique ambience in your interior with the use of milled panels. They are crafted from black-stained MDF board and their top layers are finished with high-quality natural veneer. Milled lines create intriguing geometric patterns. These panels are an excellent solution for individuals seeking extraordinary decorative elements, as they seamlessly blend into diverse interiors.

WOODEN PANELS

Our wooden panels are a unique decorative element that brings beauty, warmth and natural charm to interiors. They don't just adorn spaces but also enliven them, giving a distinctive style. Crafted from recycled wood planks, they carry a history and an eco-friendly approach. Wood is a material that evokes feelings of cosiness and tranquility. By adding wooden panels to your interior, you bring a piece of nature into it.

UPHOLSTERED PANELS

Upholstered wall panels give the cosy, relaxing atmosphere and diversify any space. They are universal products that can be used in many different ways, for example, as the headboard of the bed, the wall next to the wardrobe in the hall, the space next to the baby's crib. You can also create a cosy work space quickly and easily, using them for instance, as a mood board over a desk. They are available in many different colors and two formats: 30x30 and 30x60 cm.

FELT PANELS

Felt wall panels are hard wearing and durable, but also very soft and delicate to the touch. They have many advantages, including good sound absorption. The panels are offered in an extremely wide range of patterns and colors. That is way they are often used as an effective, functional decoration of children's rooms. In recent years, felt has also become popular as a standard material in the commercial design industry.

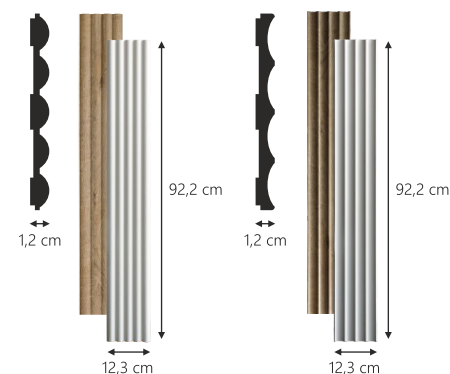

TRADITIONAL WAINSCOTING

EGEN®
HOME DESIGN

TRADITIONAL WAINSCOTING

Traditional wainscoting is an attractive type of panel molding that lines a room for decorative purposes at the bottom of a wall. We strongly recommend two color sets: classic white and oak.
